GUSS14 - 28 Development and Applications of a Semi-Analytical Approximate Thermal Simulator. Vahid Dehdari University of Alberta. This paper has been selected for presentation for the 2014 Gussow Geosciences Conference.

## **Development and Applications of a Semi-Analytical**

Application of semi-analytical finite element method coupled with finite element for analysis of asphalt pavement structural response Pengfei Liu\*, Dawei Wang, ... method is so called the semi-analytical FE method which has potential for overcoming the difficulties mentioned above.

## **Application of semi-analytical finite element method**

The application of composite materials in different areas of industry leads to the need of inspection of such components. One of the ... objective of the investigations carried out was to review analytical and semi-analytic modelling methods related to propagation of ultrasonic guided waves and to define which question can be answered by them.

## **Application of analytical and semi-analytic modelling**

Application of Semi-Analytical Methods for Nanofluid Flow and Heat Transfer applies semi-analytical methods to solve a range of engineering problems. After various methods are introduced, their application in nanofluid flow and heat transfer, magnetohydrodynamic flow, electrohydrodynamic flow and heat transfer, and nanofluid flow in porous media within several examples are explored.

## **Applications of Semi-Analytical Methods for Nanofluid Flow**

Application of semi-analytical mathematical approach for thermal analysis of convective-radiative flow with

variable ... This research paper depicts the application of highly powerful and accurate semi-analytical methods, Differential transformation method (DTM) to portray the non linear

application when traffic loads are applied. In this paper, a semi-analytical finite element method (SAFEM) is utilised as a computational kernel in a back-calculation program which can predict the variation tendency of bearing capacity of test track. The SAFEM is a three-dimensional (3D) FE program that requires only a two-dimensional
