Climate researchers have published a new paper this week in the journal Nature Climate Change that acknowledges there has been a global warming slowdown from 2000-2014. Their research shows a hiatus did indeed occur and continued into the 21st century, contradicting another study last June that said ...

New Paper Shows Global Warming Hiatus Real After All

Global warming is a long-term rise in the average temperature of the Earth's climate system, an aspect of climate change shown by temperature measurements and by multiple effects of the warming. The term commonly refers to the mainly human-caused observed warming since pre-industrial times and its projected continuation, though there were also much earlier periods of global warming.

History. The modern real (Portuguese plural reais or English plural reals) was introduced on 1 July 1994, during the presidency of Itamar Franco, when Rubens Ricupero was the Minister of Finance, as part of a broader plan to stabilize the Brazilian economy, known as the Plano Real. The new currency replaced the short-lived cruzeiro real (CR\$). The reform included the demonetisation of the ...

Every which way we measure it, the models predictions don't match the observations. The warming we've had in the last thirty years implies that at best, we could expect 1°C from a doubling of CO₂, but observations from eight natural experiments around the globe, and even on Mars and Venus suggest that 0.4°C is the upper bound of climate sensitivity to any cause.
